

MIVISU REFERENCES IN FRANCE

Document produced by Labocom

- 3,500 counting stations
- 492 weather stations
- 2,000 VMS
- 120 Bluetooth sensors
- 1,700 magnetometers

ASF- Autoroutes du Sud de la France

The ASF Network:

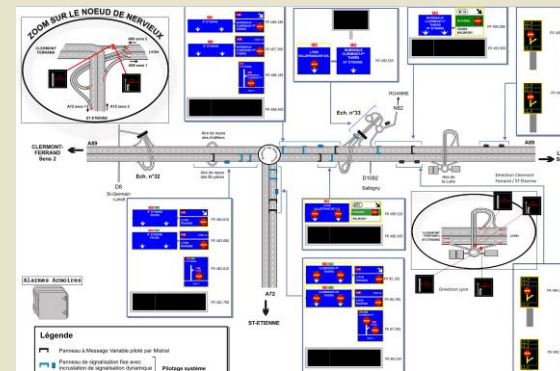

- **2,325 km** of highways
- **1 million** vehicles/day
- **558** counting stations
- **75 VMS** controlled by MIVISU
- **12** Automats
- **1,583** parking magnetometers

MIVISU Instances:

- MIVISU Traffic counting
- MIVISU Dynamic equipment
- MIVISU Free Truck Parking Place
- MIVISU Wrong-way detection

MIVISU Applications:

- **Real time traffic counting** for the entire network
- Management of the **Truck Parking places**
- **VMS Monitoring**
- Automatic **wrong-way detection**
- **Instantaneous speed regulation:** MIVISU detects the too fast driving vehicles and display a regulation message on VMS. This application concerns 75 VMS.
- **Winter regulation access:** MIVISU controles access automats (barriers and size regulation barriers) for winter to regulate traffic flows

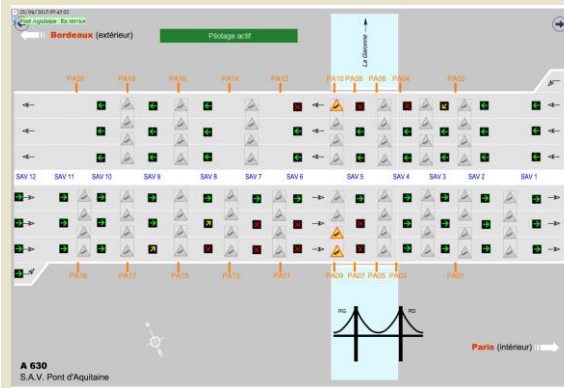

ALIÉNOR

DIR ATLANTIQUE ALIENOR

The ALIENOR Network:

- Bordeaux Ring Road: 45km
- Aquitaine bridge: 1,767m
- Inter-urban roads: 770km
- 130 counting stations
- 102 dynamic equipment

MIVISU Instances:

- MIVISU Traffic counting
- MIVISU Dynamic equipment
- MIVISU Aquitaine bridge

MIVISU Applications:

- Traffic counting for **real time** and **differed time**
- **VMS automatic monitoring**
- Management of the **Bordeaux Ring Road**
- **Management of the Aquitaine Bridge: automatic access regulation**

ATLANDES A63

The ATLANDES Network:

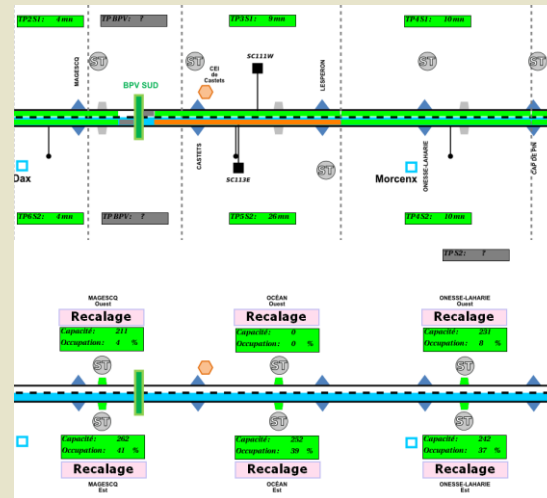

- 104km of highway
- 34,000 vehicules/day
- 12 truck parkings
- 1,200 truck parking places
- 36 counting stations

MIVISU Instances:

- MIVISU Traffic counting
- MIVISU PCADC 3
- MIVISU Free Truck parking places
- MIVISU Journey times
- MIVISU Wrong-way detection

MIVISU Applications:

- Traffic counting for **real time**
- **Data analysis and storage**
- Management of **Truck Parking places**
- Calculation of **journey time**
- **Automatic wrong-way detection**

APRR AREA

The APRR AREA Network:

- 2,263km of highways
- 349 counting stations
- 79 VMS
- 250 weather stations
- 4 truck parkings

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU Meteorology
- MIVISU Truck parking
- MIVISU PCADC 3

MIVISU Applications:

- Traffic counting for **real time and differed time**
- **data analysis and storage**
- **Weather data collection** in real time and analysis
- **VMS monitoring**
- **Management of Truck Parking Places**

COFIROUTE

The COFIROUTE Network:

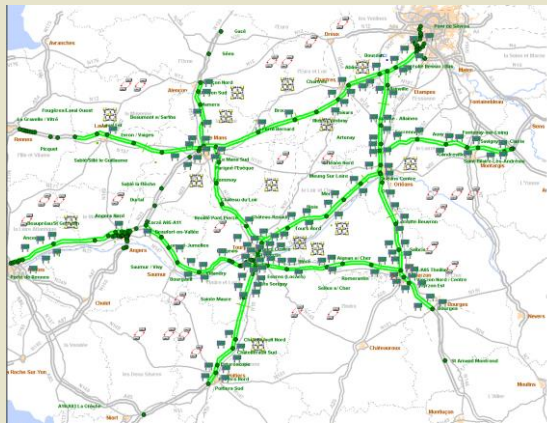

- 1,211km of highways
- 338,000 vehicles per day
- 283 VMS
- 150 counting stations
- 89 weather stations

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU Meteorology
- MIVISU Traffic Jam

MIVISU Applications:

- Traffic counting for **real time**
- **Speed regulation**
- **Weather data collection** in real time and analysis
- **VMS monitoring**

SANEF

The SANEF Network:

- 1,902km of highways
- 72 resting areas
- 150 counting stations, with 80 bluetooth sensors
- 250 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU Bluetooth
- MIVISU Journey times

MIVISU Applications:

- Traffic counting for **real time**, with **individual data**
- **Calculation and diffusion of journey times**
- **VMS monitoring**

ATMB

The ATMB Network:

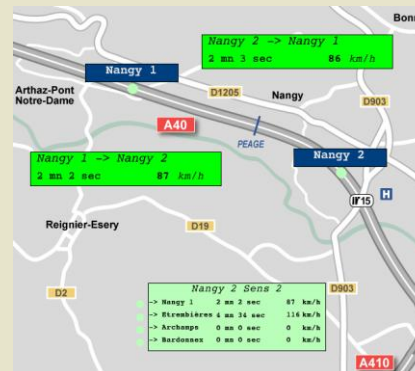

- 110km of highway
- Mont Blanc Tunnel
- 20,000 vehicules/day
- Bluetooth sensors
- 40 counting stations
- 75 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU Bluetooth journey times

MIVISU Applications:

- Traffic counting
- **VMS monitoring**
- Production of **journey times**

DIR MEDITERRANNEE

The DIR MEDITERRANNE Network:

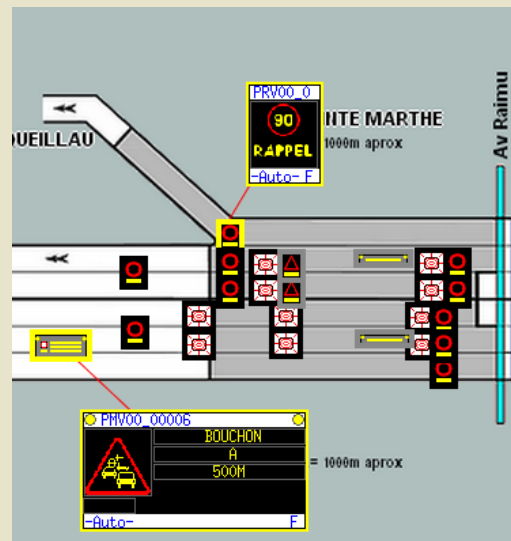

- 3 control centers:
Gap, Nîmes and Toulon
- 750km of roads
- 270 counting stations

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC 3

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **data analysis and storage**
- **VMS monitoring**
- **Traffic lights monitoring**

DIR CENTRE-EST

DIR CENTRE EST

The DIR MEDITERRANNE Network:

- 1,232km of roads
- 5 control centers
- 120 counting stations
- 87 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC 3
- MIVISU ModBus

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **data analysis and storage**
- **VMS monitoring**
- **Access regulation**

DIR Est

DIR EST

The DIR EST Network:

- 1,650km of roads
- 3 control center
- 171 counting stations
- More than 100 VMS
- 41 weather stations

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC 3
- MIVISU Meteorology

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **data analysis and storage**
- Real time **weather data** collection and analysis
- **VMS monitoring**
- **Access regulation**

DIR NORD OUEST

The DIR NORD OUEST Network:

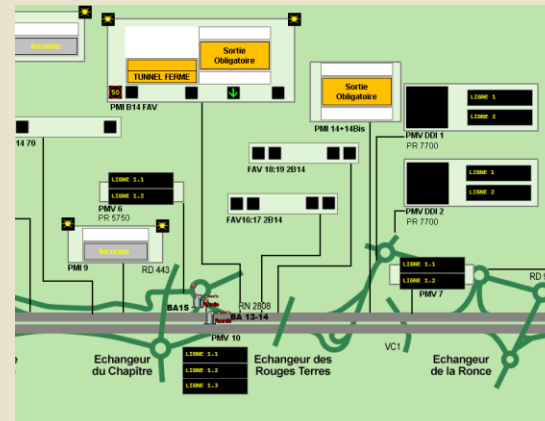

- 1,070km of roads
- Caen Ring Road
- Grand Mare Tunnel
- 100 counting stations
- More than 76 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC 3
- MIVISU Journey Times

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **data analysis and storage**
- **Journey Time** management
- **VMS monitoring**
- **Tunnel management**, with access regulation

DIR OUEST

The DIR OUEST Network:

- 1,520km of roads
- 4 CIGT
- 65 resting areas
- 239 counting stations
- 101 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC3

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **Data analysis and storage**
- **VMS monitoring**

DIR MASSIF CENTRAL

The DIR Massif Central Network:

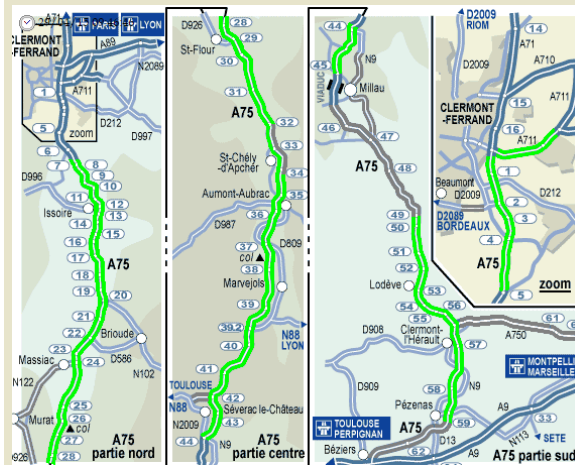

- 908km of roads
- 2 CIGT
- 100 counting stations
- 4 weather stations

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Meteorology
- MIVISU PCADC3

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **Data analysis and storage**
- **Weather management:** weather data collection and analysis

Liberté • Égalité • Fraternité

RÉPUBLIQUE FRANÇAISE

direction
interdépartementale
des routes
Sud-Ouest

DIR SUD OUEST

The DIR Sud Ouest Network:

- 939km of roads
- 2 CIGT
- 125 counting stations
- 30 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Dynamic equipment
- MIVISU PCADC3

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **Data analysis and storage**
- **VMS monitoring**

DIR CENTRE OUEST

The DIR Centre Ouest Network:

- 1,140km of roads
- 50 counting stations
- 21 weather stations
- 40 VMS

MIVISU Instances:

- MIVISU traffic counting
- MIVISU Meteorology
- MIVISU Dynamic equipment
- MIVISU PCADC3

MIVISU Applications:

- Traffic counting in **real time** and **differed time**
- **Data analysis and storage**
- **VMS monitoring**
- **Weather management:** weather data collection and analysis
